

# LEED® INFORMATION BROCHURE

## STONBLEND GSI-G

# STONHARD

Stonblend GSI-G is a nominal 5 mm flooring system that offers a cost-effective alternative to terrazzo. It combines striking, decorative looks, excellent chemical and wear resistance with an easy to maintain surface. All standard colours contain 12% recycled glass chips. The easy to maintain low gloss finish enhances Stonblend GSI-G's appeal and provides a creative and functional choice where attractive flooring is required.

Stonhard, the leader in seamless polymer floors, walls and linings, works with customers and within our own organization to provide more "green" products to the marketplace. As the Global Leader, we have numerous manufacturing facilities that can be utilized to deliver locally manufactured materials to your project. We have developed a unique packaging method that eliminates 85% of the normal waste by volume associated with metal cans from conventional polymer flooring. Combine our packaging, our complete line of low emitting products with our unique polymer floor systems, which incorporate recycled aggregate materials, and it's clear that we are committed to providing the products and initiatives to help you gain LEED® certification. Together, we can lessen our impact on the environment - Stonhard will help your project go Green!
