

LEED® INFORMATION BROCHURE

STONBLEND GSI

STONHARD

Stonblend GSI is a nominal 5 mm flooring system that offers a cost-effective alternative to terrazzo. It combines decorative looks with excellent chemical wear resistance and cleanability. Its surface provides a moderate degree of slip resistance while remaining resistant to staining, marring, and yellowing. Its easy to maintain, low gloss finish enhances Stonblend GSI's appeal wherever functional, attractive flooring is required.

Stonhard, the leader in seamless polymer floors, walls and linings, works with customers and within our own organization to provide more "green" products to the marketplace. As the Global Leader, we have numerous manufacturing facilities that can be utilized to deliver locally manufactured materials to your project. We have developed a unique packaging method that eliminates 85% of the normal waste by volume associated with metal cans from conventional polymer flooring. Combine our packaging, our complete line of low emitting products with our unique polymer floor systems, which incorporate recycled aggregate materials, and it's clear that we are committed to providing the products and initiatives to help you gain LEED® certification. Together, we can lessen our impact on the environment - Stonhard will help your project go Green!
