

STONHARD FLOOR SOLUTIONS

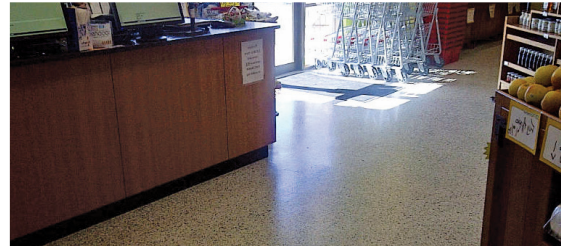

OMG Market Moncton, New Brunswick

AREA; RETAIL GROCERY STORE

PRODUCTS USED:

- STONCLAD GS
- STONTEC EFC

OMG Market, located in Moncton, New Brunswick, offers a unique blend of local food products. They focus on fruits and vegetables and have a variety of organic products available for local residents. In addition to produce, they also bring in local honey, maple products, cheeses, and even hot sauce from Prince Edward Island.

THE CHALLENGE

This new food market required a flooring system that would be easy to clean and maintain, offer impact and stain resistance, and provide aesthetic appeal. Grocery stores require constant cleaning due to foot traffic and food spills so it was vital that the flooring system address this issue, while offering a decorative finish.

THE STONHARD SOLUTION

The Stonhard team recommended a system of Stonclad GS, and Stontec EFC. Stonclad is a family of seamless, sustainable, high performance epoxy and polyurethane floor systems offering outstanding impact and abrasion resistant qualities, in addition to excellent chemical resistance. Durability and ease of maintenance are hallmarks of Stonclad systems.

Stontec EFC is an attractive seamless flooring system, which is perfect as a cost-effective, yet decorative solution for light traffic areas. Stontec floors provide both durability and aesthetics, as well as easy maintenance. This unique combination of physical properties makes Stontec ideal for use where appearance and slip resistance are main concerns.
