

STONHARD FLOOR SOLUTIONS

CTV Montréal Television Studio Bell Media Montréal, Québec

PRODUCTS USED:

- STONLUX SL, PLATINUM

AREA: TELEVISION STUDIO

CTV Montréal, formerly CFCF, was the first private station in Québec. Launched in 1961, it was one of the founding partners in the CTV network and has been affiliated with CTV for more than 40 years.

THE CHALLENGE

CTV Montréal, a division of Bell Media, was building a brand new television studio in Montréal and required a unique flooring system. The floor in this newsroom studio needed to be sleek and clean looking, while remaining impact and stain resistant.

THE STONHARD SOLUTION

The Stonhard team recommended our Stonlux flooring system. Approximately

3,500 square feet of Stonlux SL was installed in the studio.

Long-lasting, super clean and lustrous, Stonlux offers an ultra-smooth, chemical and impact resistant formulation where low friction surfaces are required.

Stonlux SL cures to a hard, aesthetically pleasing surface that is formulated for ease of maintenance, as well as its outstanding durability properties. It is specifically designed for areas that require a smooth, seamless, dense and impervious finish with good stain resistance.

The Stonlux range of flooring systems also offers a unique anti-static formulation for areas where static control is demanded.
